Art Unit: 2815

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-25, 1040109, 127-130, 138-143, 151-157, 169-178, 191-194, 207 are drawn to an IC, classified in class 257, subclass 666+.
- II. Claims 26-57, 110-115, 122-126, 131-137, 144-150, 158-168, 179-190, 195-206 are drawn to a method for making an IC, classified in class 438, subclass 106+
- III. Claims 58-103, 116-121, drawn to machine readable medium, classified in class 713, subclass 100+.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by another method without the step of routing.

Inventions I and III, and II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions whereby one is an IC and one relates to a computer program.

Art Unit: 2815

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
